

EDUCATION

Space Solutions for Education

Waco Modular Space Solutions are a leading innovator in Alternative Building Technology (ABT) and have worked with the South African Department of Education for many years. They are able to provide additional classrooms for learners at existing schools along with turnkey projects for new schools. Many more schools in the private sector are realising the benefits of mobile classrooms that are available on a rental basis.

Build quality is the cornerstone. The Waco Modular classroom concepts have been designed to create the optimum learning environment by using natural light and effective convection based air ventilation. Thermal insulation materials ensure moderate temperatures in extreme conditions. The quality, versatility and flexibility of the Waco Modular range of buildings enables them to deliver their promise - Smart, Fast Modular.

Waco Modular provide a fully integrated and managed solution from initial design and site preparation, to the supply and installation of all buildings.

EzeeSpace - The Innovative, Fast Solution

The innovative design of EzeeSpace modular units deliver a quality classroom environment that is wider, higher and larger than standard imported alternatives. EzeeSpace buildings can be up to three storeys high. The sturdy steel frame ensures a robust building, capable of accommodating any number of students.

The versatility of the EzeeSpace classroom allows us to offer several configurations. The biggest classroom is a comfortable 54 square metres. The flexibility of the modular units enables EzeeSpace solutions to be reconfigured to meet the school's changing needs.

The solid structure and quality finishes deliver an aesthetically pleasing building with a 'permanent' feeling.

Cabins - Fast and Cost Effective

Waco Modular Cabin classrooms are manufactured in a factory-controlled environment and once completed are transported from the factory on a flatbed truck to the site. Cabins can be designed to meet the educators requirements and specifications with the more common sizes being mainly 7m x 7m and 7m x 8m. The standard cabin classrooms are self-contained with all fittings, and equipped with insulated wall and roof panels, vinyl floors and aluminium windows and can comfortably accommodate 30-40 children at a time.

Waco Modular can also supply Container based space solutions through to Light Steel Frame buildings.
