

HEALTHCARE

Space Solutions for Healthcare

The need for modern healthcare facilities in both peri-urban and remote environments remains a pressing concern within Africa. Waco Modular have the knowledge and expertise to create practical, high quality and safe healthcare solutions. Our products are ideally suited to deliver a full range of space applications from day clinics to wards and complete theatre departments. The application of modular and site-build technologies means a fast rollout of new facilities, whilst delivering better value for money.

EzeeSpace - The Innovative, Fast Solution

Fast delivery of high quality buildings that provide the flexibility to adapt and extend is the hallmark of Waco Modular' modular solution. The EzeeSpace modular unit is larger, higher and wider than standard imported alternatives and can be up to three storeys high. This makes it ideal for rapid deployment to remote locations. The sturdy steel frame ensures a robust building that can deliver a clean and safe healthcare environment. The units are manufactured and packed in the stringent quality controlled Waco Modular production facility which is ISO 9001 and OHSAS 18001 certified.

Cabins

Waco Modular Cabins are relocatable buildings that are fabricated off-site, easy to transport and assembled on-site. From a single clinic building through to a multi-building hospital facility, cabins can be deployed quickly to meet your requirements. Waco Modular also has a nationwide rental fleet of standard sized units available for immediate delivery including 7m x 7m and 7m x 8m units.

Site Build

Waco Modular provide panelised buildings that are erected on site on a reinforced concrete raft foundation slab. The floor plan is therefore totally flexible and can be tailored to the customers exact needs. A site build is a faster, more cost effective solution to traditional brick buildings. As the build is a permanent structure, it is not relocatable.

Light Steel Frame Structures

The latest alternative building technology (ABT) from Waco Modular is Light Steel Frame (LSF) structures. The units are aesthetically pleasing and have a permanent feel. The versatility of the concept allows Waco Modular to provide bespoke design configurations that can meet the exact requirements of the customer. The unit is built to SANS 517 (the building standard for light steel frame buildings in South Africa).
